

Create your own

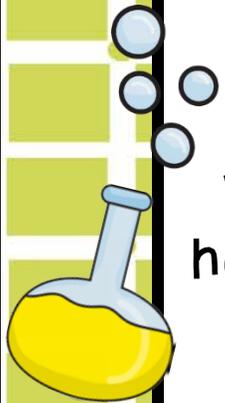

Science Board

Display

Created by: Shannon Moyer ♥ The Teaching Reef

This activity is meant for students to use when they need to create a science board display. It is most often referred to as a science fair project but you can really use this when every you want. You will find a blank 3 section organizer that the students will use to place labels on to organizer their information. Some of you might wish to give the students words to place on their labels or you might want to let them help you generate the labels. I always find it better to have the students help because then they are more likely to take ownership over their display. That is really the whole reason for creating this activity. The very first year I had my students create their display I ended up doing basically everything! I know... but I can't be the only teacher out there to take over the display board. =) However, since then I have released more and more responsibility to my students. So I hope these resources help you do just that, place the responsibility on the kids, not yourself! Good luck and happy designing!
