

Scientific Method

What do you want to learn more about?

Find out what is already known about the topic?

What do you **THINK** will happen based on what you know?

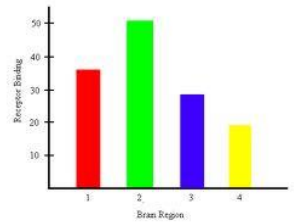

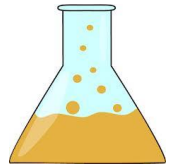

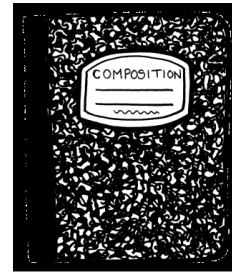

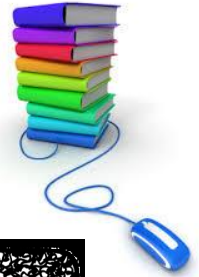

Write and follow every step of the experiment designed to test your hypothesis.

Do at **LEAST 3 trials**.

Collect information and record using charts and graphs.

Write down what you noticed during the experiment.

Was the hypothesis correct or incorrect?
What would you change, or what else do you want to know?

**FINALLY:
Display Your
Work!!**
